

Attachment F Customer Satisfaction Survey Questions and Statistical Validity Table

Statistical Validity Table

The customer satisfaction survey methodology used must meet recognized statistical standards for obtaining a statistically valid number of surveys for each Transportation Provider and shipment category.

The system will calculate the statistically valid number of surveys required for each Transportation Provider in each category based on the total number of shipments delivered to customer, and determine if a valid number of completed surveys has been achieved. The system will use "Required Number of Surveys" shown in the table below, or 10 percent of the total "Number of Shipments Delivered" for the past 12 months, whichever is greater, to determine the number of surveys needed to achieve statistically valid results.
